

Chapter 11

Human Life and Influence of Extra- Horoscope Powers

During IInd world war, atomic bomb was applied in Hiroshima and Nagasaki. Thousands lost their lives. All their horoscopes were same? Horoscopes of all people died in Bhopal Gas tragedy were the same? The sequence of questions extends in this fashion. The answers to all these questions is a big “No”. Then what is the relevance of horoscope?

You can ask “all these are fake, isn't it?” but the answer to the last question is also No.

According to the person who doesn't know the correct explanation of answers to the above questions, Astrology is a fake and pseudo thing and horoscope is a misbelieve.

Each and every person living in this world is a student of this entire universe which can be treated as a university. Every student will have a time table or time schedule. The timing of study starting from the morning upto closing in the evening will be in accordance with that time table. If any student strike occurs after the expiry of some time a day, then the study of that day ends there. The study did not advance according to the time table. In another day, study was limited to fore-noon section due to the death of a retired teacher of the school. That day also, study was not properly conducted according to the fixed time table.

From the said two instances, one point is clear. Student strike and teacher's death were not shown in the time table. Because that incidents were not according to the time table and not a part of the time table. But these incidents could influence and affect the study according to the time table fixed earlier.

Now, come to the point. Horoscope is a time table for the life of every person. Just like the strike and the teacher's death disturbed the study, there are so many things which can influence and conquer human life, and destroy the horoscope results and also make results not related to the horoscope. Those powers are called extra- horoscope Powers.

Suppose a bus moving with full of people. The driver is a drunkard. Within some time, the bus had fallen into a valley and so many passengers died. Here alcoholism of the driver acts as the extra- horoscope power. It influenced and conquered the lives of the passengers and made extra- horoscopical results(results not related to the horoscope).

There was no indication of handicap in the horoscope of some passengers. But so many became handicapped. Some other's horoscope contained the prophecy of long living. But they were also included in the list of whom had untimely death. Some of the killed persons possessed the evil influence of Mars and some others possessed the good influence of Venus. Nobody's horoscope said they would have been killed in a bus accident. If so, how much

severe the accident, only that person would have been killed. Others would have been escaped without minute injury.

Horoscope of the killed ones are same? No!! horoscope is the time table of life which may be known or not known to us. It doesn't have any impact on the bus accident. Because bus accident is nobody's horoscope result.

Why extra- horoscope powers are called super horoscope powers? Because before extra-horoscope power, the horoscope and the horoscope results and through them the life of every person surrenders unconditionally.

We can compare horoscope as chaff and the extra horoscope powers as typhoon. Always the extra horoscope powers have more power than horoscopes. Therefore they are called super horoscope powers.

Only God can remove and deviate these damned extra horoscope powers. If everything proceeds smoothly according to the horoscope, then there will be no relevance to prayers. Here comes the importance of prayers, offerings, invocation like Holy Mass etc. Christ is the only one person among those who lived in this world, who didn't have even a tiny fragment of the influence by the extra horoscope powers. But we see in the holy book that he had been busy with prayers to God.

We should be alert that any time extra horoscope powers can garb the human being, which can influence horoscope and through it the life as well and conquer the life and destroy or deviate it. Only such persons will have the proper dependency towards God.

Does anybody can ask the question relating the strike with the time table, "was the time table of all these students the same?". The answer is obviously 'No'. Because no period was included in the time table for strike. The method of the extra horoscope powers also the same. They won't appear in the horoscope. They are not the result of anybody's horoscope.

The horoscope of a person means the direction of the life of that person during the period in which there is no influence or effect of the extra horoscope powers upon his/her life. If one astrologer comments about the horoscope of a particular person, that is valid only if the extra horoscope powers won't have any effect in the life of that particular person. If an astrologer judged that a child is having a long span of life, that means if that child would not have been died due to the effect of extra horoscope powers, then he/she will be having long life span.

The incidents done by the influence of extra horoscope powers will be accidental or by chance. All the incidents done in the life of a person are results of his/her horoscope. The above belief is wrong. Life is a mixture of incidents due to horoscope results as well as incidents due to the influence of extra horoscope powers.
